POWER PROVE

Standard Series

AC500 Load bank

500kW load bank with integrated touchscreen control system providing the ultimate way to verify an electrical supply.

Key features

Advanced interface

The unique Digiload control system provides detailed insight into how the supply under test responds to load changes. The integrated touchscreen interface can be used to manually change the load power level or setup an automated schedule of load steps. Once created, load step sequences can be saved and recalled at any time.

Quick setup

Powersafe connectors fitted to the main load terminals make connection to the supply under test simple, fast, and secure. The power connections are located away from the control panel. With power connected, the 7" intuitive touchscreen interface enables load to be applied rapidly, with real time measurements displayed immediately.

Portable

Transport to any location with integrated forklift points. Move around onsite using heavy duty castors, which are included as standard. Alternatively, the design can be installed in a fixed location, when requested, the heavy-duty castors are replaced with mounting brackets with holes for anchor bolts.

Robust construction

The resistor elements used are from our catalogue of highly robust industrial stamped grid technology using stainless steel. The construction puts the cooling airflow in direct contact with the conductor surface to maximise heat transfer, thus providing the longest possible operating life for the elements.

AC500 Technical specification

Ratings

3-phase 1-phase Voltage, V 400 230 Frequency, Hz 50 or 60

Load steps, kW 2x 25 2x 8.3

4x 100 4x 33.3

1x 50

Total capacity, kW 500 166.7

Control and ventilation

Manual controls Supply source select,

Fan on/off, Emergency stop.

1x 16.6

Control interface 7" touchscreen display

Cooling Forced convection, horizontal orientation

Fan(s) 1x AC fan, axial type

(95dBA)

2x Cabinet fans

Control supply 400V AC 3-phase 50Hz
Source Internal (supply under test)

or external supply (recommended)

Connection interfaces

Load connections 10x Powerlock drain

sockets (2 each; 3P+N+PE) 32A IEC 5-pin panel plug

Control supply 32A IEC 5-p Data downloads USB Type-A

Networking/remote 1x RJ45 + 1x 9-pin logic

Safety

circuit fuse protection

Thermal protection Thermal trip

Airflow status detection

Operating environment

Service condition
Ambient temperature

Ingress protection

Outdoor use 5°C to 40°C IP23 Load enclosure

IP54 Controls

Accessories

Remote control

The Digiload remote control provides the ability to control

the load bank remotely via a

wired connection.

Supply cables Lengths of 5m, 10m or 25m

as standard. Powerlock inline source plugs one end and cable lugs the other

Storage cover PVC cover for transport or

storage of the unit.

Construction

Resistor elements Stamped grid Element material Stainless steel

Enclosure Galvanised sheet steel,

painted RAL9002 grey

Manoeuvrability 4 x heavy duty castors

Testing and standards

Every unit is subjected to routine testing before dispatch, including functional operation, electrical

insulation testing and visual inspection.

Documentation

Supplied with an operation and maintenance manual and routine test report as standard.

Warranty

The equipment is covered by a 12-month warranty.
